

IKM
Inspection AS

Inspection services

Norway's largest provider of inspection services and NDT

IKM Inspection was established in 2005 when IKM acquired OIS Inspection in Kristiansand. OIS Inspection was already an established and leading supplier to the offshore industry in Norway. Over the years, IKM Inspection has expanded and made several other acquisitions. We currently have branches in Fredrikstad, Drammen, Larvik, Brevik, Arendal, Kristiansand and Stavanger. We are a part of the IKM Group. The IKM group comprises 24 companies and has approximately 2,450 employees. The group has a budgeted turnover for 2019 amounting to NOK 4.3 billion.

HSEQ:

- Certified, ISO 9001-2008 & OHSAS 18001
 - Approved supplier in EPIM JQS
-

A part of the IKM Group

IKM Inspection is part of the IKM group – a multidiscipline sub supplier focusing primarily on the oil and gas industry.

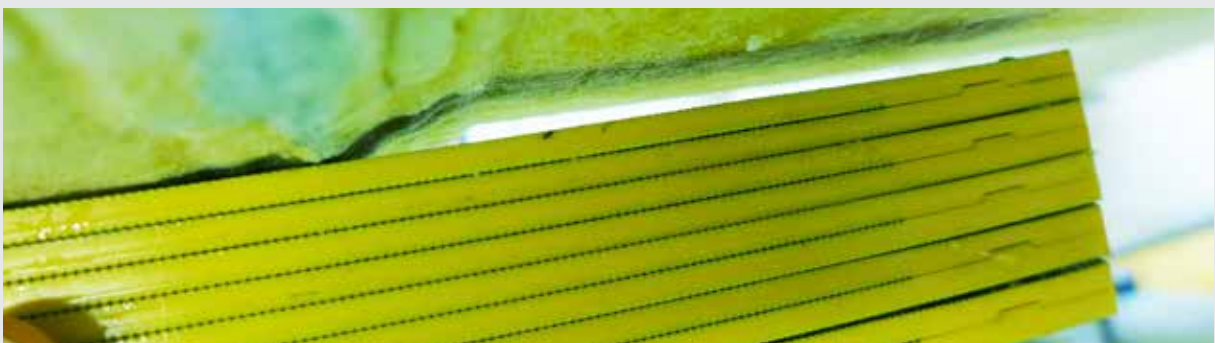

The IKM Group conducts business within the following five areas:

- *Instrument/Automation/Inspection*
- *Subsea/Mechanical completion/Commissioning*
- *Engineering/Operations*
- *Electrical/Sheet metal*
- *Rig/Downhole services*

Focus on Growth is always the goal, and IKM's ambition is that even the most demanding customer shall choose IKM as their preferred business partner. All IKM companies are ISO-certified, and through internal revisions, audits, and continuous monitoring, IKM Corporate Group ensures that it meets and exceeds the needs of its customers and employees with respect to quality, health, safety and the environment.

Our Values

- Responsible
- Bold
- Clear
- Focused

Our services

We provide all types of quality control, NDT (Non Destructive Testing) and inspection services. We are currently one of Norway's largest providers of such services. Certification of welders and solderers is also an important part of our work. Our activities are primarily aimed at offshore, petrochemical plants and the mechanical engineering industry. IKM Inspection has approximately 100 highly qualified inspectors with certificates in all NDT methods.

Our activities largely comprise NDT, material- and welding inspections.

We provide services in the fields of:

- NDT, material inspections and welding inspections
- Phased array and time of flight ultrasonic testing
- Quality control
- In-service inspection of pipe, tank and structures
- Certification of welders and solderers in collaboration with Kiwa
- Third-party/supplier inspection in the fields of welding, mechanical, electrical, automation, HVAC and E&I.
- RPAS: Remotely piloted aircraft system/drone inspection
- Rope Access inspection

**Quality in
every
stage**

We are a capable and safe player

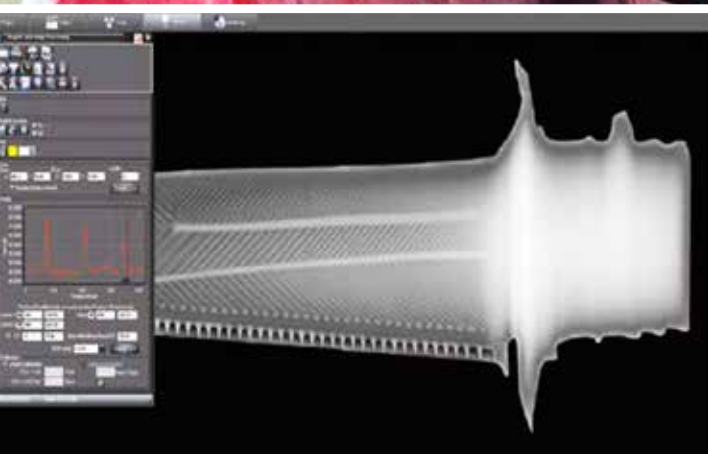

We are an efficient and very capable player that emphasises HSE and quality. To us, no operation takes priority over safety, and our work methods have great emphasis on minimising risk. All of our assignments are carried out according to customer specifications and statutory requirements.

Environmental and social responsibility

Environmental and social responsibility is essential to us to demonstrate social responsibility and to take environmental considerations.

We therefore focus on reducing the amount of waste and optimising our use of resources, preventing pollution and reducing negative environmental impacts. Along with our customers and suppliers, the goal is to continuously improve our practices in environmental management. This commitment results in savings for our customers, and it can also provide us with opportunities in interesting new business areas.

Our customers

Currently our largest customers 18 offshore/ onshore facilities / processing plants, mechanical engineering workshops and the mechanical engineering industry. Our customers in maintenance and in-service inspections include Ineos Rafnes, Esso Slagentangen and Yara Porsgrunn.

In the areas of material inspection / NDT, TechnipFMC, Aibel Haugesund, Aker Solutions Eigersund, Kværner Stord, Rosenberg Worley Stavanger and Nymo in Grimstad are among our largest customers.

Potential customers

We are seeing that more sectors need our services and expertise.

NDT is a service we can provide to more sectors than in which we currently operate.

Building and construction

Building and construction has similar requirements to the sectors that we currently work. Here, there is extensive use of steel installations that require our NDT services

Renewable energy

Windmills consist of large steel structures that are subject to stringent quality requirements.

The hydropower industry also requires NDT in some circumstances.

Here we may also provide expertise in the field of NDT.

Personnel certification

We partner with KIWA Teknologiske Institutt, which develops certification programmes for welders and solderers.

These are certifications IKM Inspection offers all relevant industries on behalf of KIWA.

Our focus is growth!
