

IKM – EVT

ROOF AIR EXHAUST / INTAKE

DESCRIPTION

The IKM's EVT roof air exhaust / intake has a segmented and efficient modern design. The roof air exhaust / intake serves a radial 360 ° air distribution above the roof plane. Flanges type make the joint and the whole structure stiffer and wind resistant. Several type of surface finish can be made.

Material:

- AISI 316L (1,4404 / 1,4401)
