

TANK CLEANING MACHINE

Type

Fabricator.....: Butterworth
Model.....: LT-12
IKM Part number.....: TCM-02
Suitable for.....: Tank Cleaning

Technical Specifications

Work pressure (bar).....: 21
Work pressure (psi).....: 300
Number of Nozzle Ports.....: 2

Additional information

Equipment / Functions.....: The Butterworth Type LT automated tank cleaning machine provides 360° impact indexed coverage for the cleaning of the inside of tanks and process vessels.

Operational

The Butterworth LT machine creates a pattern matrix similar to a ball of twine. A complete pattern is established when 65 axial revolutions of the body have been completed. During the process of this pattern build out, 4 cycles are established with each cycle increasing the density of the pattern matrix.
