

## PATENTED FLANGE PROTECTION - FLANGE BUMPER

### Type

Specification.....: Flange BUMPER  
Flange specification.....: Flange Protection for ANSI flange  
Flange Pressure class.....: 150#  
IKM Part number.....: S\_106356\_004 (EP304)

### Dimensions

Flange Diameter (Ø) (mm).....: 229  
Dimension (inch).....: 4"

### Bolts

Qty bolt holes.....: 8

### Additional information

Equipment / Functions.....: This system produces an air tight, water tight seal that is proven to protect the critical surface areas of your pipe spools, valves, vessels, and mechanical equipment against any weather condition. It also seals the interiors of those items, preventing your corrosion inhibitors from escaping, and does not allow outside air and moisture to get inside to do unseen damage.

- Easy to install
- Light weight composite material
- Can be re-used
- Cost effective preservation
