

Technical datasheet

Coolsafe 3171

Item number 12001

Introduction

Anti-scale and anti-corrosive liquid for closed systems.

- Specifically developed to suit the special demands of closed systems
- Eliminates the need for changing system water. Product can be added to existing system water^{*)}
- Corrosion protection is provided through anodic, cathodic and absorption inhibitors.
- The product delivers specific inhibitors for
 - Steel and iron
 - Aluminum and alloys
 - Copper and alloys
- Maintains clean heat surfaces in hard water conditions through dispersant action
- Product is easy to use; Added to system as delivered
- Product is non-acidic and non-caustic
 - Non-hazardous labelled
 - High safety for personnel handling the product
 - Product concentration is easy to analyze
 - Easy on-site analysis

Min 1000 kg's order.

Features

- Fill-for-life program
- Add-on product
- Extended life time of system

Safety features

- The product is not classified according to the CLP regulation

Capacity & performance

Type of fluid:	Cooling water
Delivered in:	25 ltr, 10 ltr, and 1 kg

Weight & dimensions
