

## Technical datasheet

Novaclean N

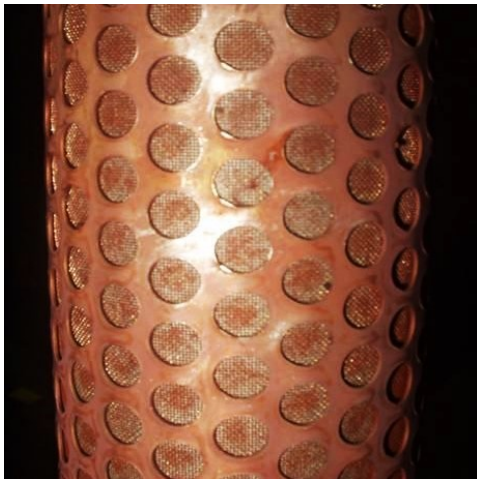

Item number: 12017

### Introduction

Novaclean N is a neutral rust and scale remover designed for immersion and spray processes on a wide variety of materials including ferrous and non-ferrous metals. It is especially applicable for the removing of residues resulting from deburring processes or laser cutting.

### Before cleaning

### After cleaning

### Capacity & performance

Physical state	Liquid
Odor	N/A
Colour	Clear/slight yellowish
Boiling temp. / range (1013 hPa)	N/A

### Weight & dimensions, each box.

Flash point	None up to 100°C
Density (20°C)	1,37-1,41 g/cm <sup>3</sup>
PH value (20°C)	5,5-6,2
Water solubility (20°C)	Fully miscible
